## Technical Skills

**Languages**: Python, JavaScript, TypeScript, SQL, HTML, CSS
**Frontend**: React, Tailwind CSS, CSS Modules, Vite
**Backend**: FastAPI, Pydantic, REST APIs
**Databases**: PostgreSQL, NoSQL, MongoDB
**Testing and Tools:** pytest, FastAPI TestClient, Git, GitHub, GitLab, Docker

## Technical Projects

**Windows XP Portfolio |** Front-End Developer June 2026

React, TypeScript, Vite, CSS Modules | davidiuku.github.io/windows-xp-portfolio

- Built a desktop-style portfolio with reusable React components and typed window state supporting focus, stacking order, dragging, resizing, and minimize, maximize, and restore behavior.
- Implemented draggable desktop icons with grid snapping and checks to prevent icons from sharing the same grid position, plus folder and file views for browsing projects and resume content.

**Roamio** | Travel Planning Application | Full Stack Engineer Jan 2025

Python, FastAPI, PostgreSQL, pytest, React, Docker | gitlab.com/man-down/roamio

- Developed FastAPI endpoints, Pydantic models, SQL queries, and database migrations for trip and lodging workflows within a three-person team.
- Built React forms and itinerary views for managing trips and activities, adding date validation to keep activity dates within the selected trip.
- Integrated Google Maps, Geocoding, and Places features to display activity locations, update map markers, and provide address autocomplete.
- Wrote pytest tests for trip creation and retrieval using FastAPI TestClient and dependency overrides, checking HTTP status codes and JSON responses.

## Professional Experience

**City of Hope | Outcomes Research** Apr 2021 – Jul 2024

Clinical Research Assistant I

- Investigated missing repeat-transplant records and helped revise import logic, table relationships, and queries to track consent and samples by transplant event.
- Built a relational Access database linking patients to multiple providers, with forms and queries tracking medical-record requests, status, and follow-up deadlines.
- Reconciled Excel and database reports, tracing discrepancies to missing dates, incorrect status flags, incomplete records, and query filters.

## Education

**Hack Reactor** | Advanced Software Engineering Immersive Feb 2025

**University of California San Diego** Jun 2020

Bachelor of Science in Molecular and Cell Biology
