TECHNICAL SKILLS

Programming Languages | Python 3, JavaScript ES6+, SQL, HTML5, CSS, TypeScript
System Design | Monoliths, Microservices, Domain-driven design, Message passing, Event sourcing
Back-End | Django 4, PostgreSQL, MongoDB, CI/CD
Front-End | DOM manipulation, WebSockets, React, Vite

RELEVANT PROJECTS

Windows XP Portfolio | Front-End Engineer | Live Site | GitHub Jun '26
<https://github.com/davidiuku/windows-xp-portfolio>
React, TypeScript, Vite, CSS Modules

An interactive Windows XP inspired developer portfolio that recreates a desktop operating system experience in the browser, designed to showcase projects and resume content through a familiar file style interface.

- **Interactive Desktop UI:** Built draggable desktop icons, selected icon states, grid snapping behavior, openable windows, and taskbar interactions to recreate familiar Windows XP desktop behavior in the browser
- **Custom Window Management:** Managed React state for active windows, focus handling, z-index ordering, minimize and restore behavior, maximizing toggling, dynamic positioning, and resizable window layouts

Roamio | Full Stack Engineer | <https://gitlab.com/man-down/roamio> | Jan '25
React, HTML, Tailwind CSS, Docker, Python, JavaScript, FastAPI

Roamio is a travel log website designed to help users plan trips and efficiently manage their lodgings, events, and flights all in one place.

- **Developed RESTful APIs using FastAPI**, implementing full CRUD operations for user authentication, trips, events, lodgings, and flights, with robust error handling for data integrity
- **Integrated Google Maps and Places APIs** to dynamically display trip locations with markers and enable address autocomplete, enhancing user engagement and experience
- **Implemented CI/CD pipelines and unit testing**, ensuring code reliability, streamlined deployments, and continuous integration across development environments using Docker

PROFESSIONAL EXPERIENCE

City of Hope - Outcomes Research | Clinical Research Assistant I | Lead Apr '21 - Jul '24
CRA on Long Term Follow Up Study

- **Managed and maintained** a comprehensive Access Database for tracking +1000 consented and un-consented patients, ensuring up-to-date and accurate data in compliance with Institutional Review Board (IRB) standards
- **Designed and implemented** database updates to accommodate protocol changes, enabling seamless data collection and reporting for a Long-Term Follow-Up Study
- **Streamlined communication** with Transplant Nurse Coordinators to track un-consented patients and ensured timely consent for patients undergoing HCT or CART treatment plans

EDUCATION

Hack Reactor | Advanced Software Engineering Immersive Program Feb '25
University of California San Diego | Molecular and Cell Biology - B.S. Jun '20
Santa Monica College | Associate in Science - A.S. Jun '18
